

February 2017 Monthly Report

This month we took care of 512 patients, of whom 98 were unable to pay for their medicine because of limited financial resources. The clinic makes them free of charge for these patients.

In the Dental Clinic there were a total of 132 patients, of whom 53 received free treatment.

That makes a total of 644 patients for the month of February, of whom 151 were unable to pay.

Ten patients were helped economically for transport to receive medical care at the Hospital Escuela in Tegucigalpa, 8 of them by ambulance.

This month a 27 year old woman came to the clinic who had been diagnosed with an ovarian cyst. The patient had a history of 2 previous miscarriages and had been treated. But in the second month of treatment she had to stop the treatment because of economics. The young couple have been married for 8 years and unable to have children.

The clinic helped the patient to restart treatment and to have a good control for her third pregnancy. And finally, after 8 years of waiting, the patient had a healthy girl. Now the baby is a patient of the clinic and is thriving. The child is a true miracle, thanks to the Lord.
